

I beleive that the the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. I value spending time with my wife and kid and have no desire to change that. My parents who live in virginia cannot even answer their phone in the evening because of all of the solicitors, I cannot even imagine that happening to me.

The strength of the law in Indiana on telephone solications continues to maintain my quality of life. Please do not change this!
